Size/s

up to 90mm wide

up to 140mm wide

up to 200mm wide

up to 300mm wide

bespoke sizes available

Material/s

Available in laminate plastics, metallex plastics and real metal in a wide choice of finishes

Metal Nameplates: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to it's wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.
