

Anitmicrobial Name Badges

product specifications

Details

- The safest, most hygienic name badges ever, designed to help protect people in care environments who need to get close to patients, where a name badge can get particularly close and be in direct line to harmful bacteria – at no additional cost to a normal name badge.
- Eco recycled plastic base with Biomaster antimicrobial protection added plus a choice of gloss or matt Pure Zone antimicrobial laminate surface finish
- The special additives to the badge base and laminate surface finish are proven to reduce the growth of bacteria and other microbes by up to 99.99%, even antibiotic resistant bacteria such as MRSA. Both materials are tested according to ISO22196 standards
- No minimum order quantity at size 75X38mm
- Full colour printing with matt or gloss surface finish, which is alcohol resistant to protect the print
- Wide choice of fittings – pins, clips and magnets
- Other sizes and shapes possible, minimum order 250
- Pay as you go, stock holding and monthly payment accounts all available
