

# Bamboo Award with Metal + Acrylic Front - 95mm x 175mm

product specifications

## Details

- 30mm thick bamboo award, manufactured in the UK from sustainable Moso® bamboo in warm caramel tones
- Metal face plate in a wide choice of finishes (see above)
- Greencast® acrylic front supported on 2 satin silver pillars
- Full colour print to the metal face plate and/or acrylic front
- 4 standard shapes (see above) available in 3 standard sizes
- Bespoke shapes & sizes possible on supply of artwork ideas at additional cost
- No minimum order quantity

## Size/s

(w) 80mm x (h) 150mm x (d) 30mm

(w) 95mm x (h) 175mm x (d) 30mm

(w) 110mm x (h) 200mm x (d) 30mm

## Material/s

**Base:** Moso® Bamboo material only comes from licensed managed forests, is harvested every 5 years and made in a factory that is ISO 9001 quality and ISO 14001 environmental third party certified. It complies with the most stringent international material standards. Moso® bamboo combines all of the virtues of hardwoods with the immense growing capacity of the highly renewable giant Moso® bamboo species acting as a green carbon negative alternative material where no additional water or pesticides are needed. Bamboo material simply biodegrades at end of life.

**Metal Face Plate:** Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

**Front:** Greencast® acrylic is produced from 100% recycled acrylic and is 100% recyclable at the end of its useful life if disposed of correctly, creating a full circular economy for the prevention of acrylic plastic waste ending up in landfill. Greencast® acrylic uses a proprietary process for the recovery of the original solvent (PMMA) for the production of new acrylic which can, in turn, be recycled countless times without ever losing its virgin quality. All our Greencast® acrylic factory waste is recycled for zero landfill production.
