

# KeepSafe Keyrings - Double Sided

product specifications

## Details

- Issue these tools to all your staff and you will reduce possible virus transmission in the workplace. Can be used to avoid contact with most commonly used surfaces, personalised with a name for an extra level of safety and security, easy to keep clean with soap and water when people wash their hands
- Manufactured in the UK from 3mm white, clear or black Greencast® acrylic, laser cut to shape
- Choice of 4 standard designs (see above)
- Keyrings can be printed in full colour, single or double sided or simply supplied as plain stock
- Can be personalised with individual names by laser engraving
- Keyrings have a clear plastic connector to a 24mm nickel split ring as standard
- Minimum order quantity of just 25
- Part of the KeepSafe range of personal protection products, see website for more details

## Size/s

Digit: 74mm x 41mm  
Everywhere: 120mm x 65mm  
Helping Hand: 70mm x 45mm  
Square Nose: 70mm x 40mm

## Material/s

**Greencast® acrylic disc:** is produced from 100% recycled acrylic and is 100% recyclable at the end of its useful life if disposed of correctly, creating a full circular economy for the prevention of acrylic plastic waste ending up in landfill. Greencast® acrylic uses a proprietary process for the recovery of the original solvent (PMMA) for the production of new acrylic which can, in turn, be recycled countless times without ever losing its virgin quality. All our Greencast® acrylic factory waste is recycled for zero landfill production.

## Fitting/s

Keyrings have a clear plastic connector to a 24mm nickel split ring as standard
