- High quality felt backing as standard in a choice of colours
- Cork backing is available on metal coasters at a small additional cost
- Minimum order quantity of 50 units

## Size/s

125mm Square

146mm x 95mm Oblong

## Material/s

**Metal Coasters:** Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

**Backing:** High quality felt back as standard in a choice of classic colours. Cork (also available) is 100% eco. Renewable, recyclable and biodegradable, it is naturally harvested from tree bark without the need for cutting down the whole tree. It is also waterproof, buoyant, flexible and fire resistant making it an ideal backing for coasters.
