

Laserline Combination Plaque - 8" x 10"

product specifications

Details

- Silver coated 8mm thick base with aluminium metal plate and 8mm clear Greencast® acrylic front supported by 4 silver pillars and end caps
- Superb 4 colour process print to metal plate and/or acrylic front
- Wide choice of metal finishes available (see above)
- Special shapes & sizes possible at an additional cost
- Rear wall slot for hanging as standard
- Recommended for internal use only
- No minimum order quantity
- Call off and monthly administration systems are available

Size/s

6" x 8"

8" x 10"

Material/s

Front: Greencast® acrylic is produced from 100% recycled acrylic and is 100% recyclable at the end of its useful life if disposed of correctly, creating a full circular economy for the prevention of acrylic plastic waste ending up in landfill. Greencast® acrylic uses a proprietary process for the recovery of the original solvent (PMMA) for the production of new acrylic which can, in turn, be recycled countless times without ever losing its virgin quality. All our Greencast® acrylic factory waste is recycled for zero landfill production.

Base: 8mm silver coated MDF

Metal Plate: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.
