- Double sided keyrings can have the same or different designs on each side at no extra cost
- Keyrings have a clear plastic connector to a 24mm nickel split ring as standard. Metal connector available at extra cost
- Minimum order quantity of 25 units

Size/s

Bespoke: Any shape or size up to 60mm x 30mm

Material/s

Metal Keyring: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

Fitting: Keyrings have a clear plastic connector to a 24mm nickel split ring as standard.
