

Wood Block Award with Metal + Acrylic Front - 80mm x 150mm

product specifications

Details

- 28mm thick solid real wood block awards with aluminium metal face plate and clear Greencast® acrylic front supported on 2 satin silver pillars
- Made in the UK from sustainably sourced wood supplies in a choice of oak, cherry or maple as standard or walnut at a small extra cost
- Wide choice of metal finishes (see above)
- Full colour process print to the metal plate and/or acrylic front surfaces
- 16 other unique shapes in up to 4 sizes also available in this range (see p.02 for details)
- No minimum order
- Bespoke shapes & sizes possible on supply of artwork ideas at an additional cost

Size/s

80mm x 150mm x 28mm
95mm x 175mm x 28mm
110mm x 200mm x 28mm
125mm x 225mm x 28mm

Material/s

Wood Base: Wood is inherently renewable and sustainable when properly sourced and managed and we only use wood from suppliers with proven supply chain certification to international standards. As a natural organic material, wood has a lighter carbon footprint than almost all synthetic materials. All wood types simply biodegrade at end of life. Production waste is used in agriculture and for home heating due to its incredibly low moisture content.

Metal Plate: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

Front: Greencast® acrylic is produced from 100% recycled acrylic and is 100% recyclable at the end of its useful life if disposed of correctly, creating a full circular economy for the prevention of acrylic plastic waste ending up in landfill. Greencast® acrylic uses a proprietary process for the recovery of the original solvent (PMMA) for the production of new acrylic which can, in turn, be recycled countless times without ever losing its virgin quality. All our Greencast® acrylic factory waste is recycled for zero landfill production.
