

Real Wood Clocks

product specifications

Details

- 28mm thick solid real oak clocks. Made in the UK from sustainably sourced wood supplies
- Choice of 3 standard shapes - oblong, asymmetrical and arch
- Choice of square or round metal clock faces with silver grain finish, in 2 different sizes
- Laser engrave or full colour print to the front surface only
- Hand finished with satin wood oil and wax
- Clock movements are German made quartz movements, RoHs certified
- Each clock is supplied with 1 x AA battery
- No minimum order

Size/s

(h) 220mm x (w) 145mm x (d) 28mm

**nb.* Wood products may vary to that shown. Natural inconsistencies occur in wood (colour, blemishes, grain) which add greatly to the individuality of each order.

Material/s

Clocks: Wood is inherently renewable and sustainable when properly sourced and managed and we only use wood from suppliers with proven supply chain certification to international standards. As a natural organic material, wood has a lighter carbon footprint than almost all synthetic materials. All wood types simply biodegrade at end of life. Production waste is used in agriculture and for home heating due to its incredibly low moisture content.

Oak is light to medium brown in colour. Engraving produces a distinctive 'burnt' effect quite different to other wood types but with a good level of contrast. All wood types have good ink adhesion, digitally print well, with good colour accuracy.

Clock Face: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.
