

# Real Wood Paperweights with Domed Metal Insert

product specifications

## Details

- Beautiful solid real wood paperweights with a domed metal insert. Made in the UK from sustainably sourced wood supplies
- Choice of cherry or oak or walnut at additional cost
- Wide choice of metal finishes (see above)
- 90mm diameter and 28mm thick
- Full colour print to the top surface only
- Hand finished with satin wood oil and wax
- Cork base
- No minimum order
- Shipped in plastics free packaging

## Size/s

(d) 90mm x (h) 28mm

*\*nb. Wood products may vary to that shown. Natural inconsistencies occur in wood (colour, blemishes, grain) which add greatly to the individuality of each order.*

## Material/s

**Paperweight:** Wood is inherently renewable and sustainable when properly sourced and managed and we only use wood from suppliers with proven supply chain certification to international standards. As a natural organic material, wood has a lighter carbon footprint than almost all synthetic materials. All wood types simply biodegrade at end of life. Production waste is used in agriculture and for home heating due to its incredibly low moisture content.

**Metal Insert:** Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

**Base:** Cork is 100% eco. Renewable, recyclable and biodegradable, it is naturally harvested from tree bark without the need for cutting down the whole tree. It is also waterproof, buoyant, flexible and fire resistant making it an ideal base for paperweights.
