

# Real Wood Paperweights

## product specifications

### Details

- Beautiful solid real wood paperweights. Made in the UK from sustainably sourced wood supplies
- Choice of cherry or oak. walnut at additional cost
- 90mm diameter and 28mm thick
- Laser engrave or full colour print to the top surface only
- Hand finished with satin wood oil and wax
- Cork base
- No minimum order
- Shipped in plastics free packaging

### Size/s

(d) 90mm x (h) 28mm

*\*nb. Wood products may vary to that shown. Natural inconsistencies occur in wood (colour, blemishes, grain) which add greatly to the individuality of each order.*

### Material/s

**Paperweight:** Wood is inherently renewable and sustainable when properly sourced and managed and we only use wood from suppliers with proven supply chain certification to international standards. As a natural organic material, wood has a lighter carbon footprint than almost all synthetic materials. All wood types simply biodegrade at end of life. Production waste is used in agriculture and for home heating due to its incredibly low moisture content.

**Oak** is light to medium brown in colour. Engraving produces a distinctive 'burnt' effect quite different to other wood types but with a good level of contrast.

**Cherry** is pinkish brown when freshly cut, darkening to a warm reddish brown over time. Great to engrave, producing strong contrast and good clarity.

**Walnut** ranges from pale brown to dark chocolate brown with darker brown streaks. Engraves well but the darkness of the wood provides less contrast than other wood types.

All wood types have good ink adhesion, digitally print well, with good colour accuracy.

**Base:** cork is 100% eco. Renewable, recyclable and biodegradable, it is naturally harvested from tree bark without the need for cutting down the whole tree. It is also waterproof, buoyant, flexible and fire resistant making it an ideal base for paperweights.
