## Size/s

(h) 120mm x (w) 126mm x (d) 28mm

(h) 160mm x (w) 168mm x (d) 28mm

*\*nb. Wood products may vary to that shown. Being a completely natural material, it varies in colour, blemishes, grain and other inconsistencies - it adds greatly to the individuality of each order.*

## Material/s

**Wood Base:** Wood is inherently renewable and sustainable when properly sourced and managed and we only use wood from suppliers with proven supply chain certification to international standards. As a natural organic material, wood has a lighter carbon footprint than almost all synthetic materials. All wood types simply biodegrade at end of life. Production waste is used in agriculture and for home heating due to its incredibly low moisture content.

**Oak** is light to medium brown in colour with varied and openly porous grain patterns. Engraving produces a distinctive 'burnt' effect quite different to other wood types but with a good level of contrast.

**Cherry** is pinkish brown when freshly cut, darkening to a warm reddish brown over time. Smooth, closed and straight grain, great to engrave, producing strong contrast and good clarity.

**Walnut** ranges from pale brown to dark chocolate brown with darker brown streaks. Moderately open grain, it engraves well but the darkness of the wood provides less contrast than other wood types.

All wood types have good ink adhesion, digitally print well, with good colour accuracy.
